A cookie is a small piece of data stored on your device when you visit a website. Cookies may be needed to operate a website, remember preferences, protect transactions, understand website use or support marketing.

Cookies used on our website

Essential cookies

These are required for website security, fraud prevention, session management, shopping baskets, checkout and other core features. They can generally operate without optional consent because the website cannot provide the requested service properly without them.

Functional cookies

These may remember choices or enable optional website features.

Analytics cookies

These help us understand how people use our website, which pages are visited and how the site performs.

Marketing cookies

These may be used to measure advertising or provide more relevant marketing.

Non-essential cookies are not intended to be activated until you have made the relevant choice through our cookie-consent system.

Wix essential cookies

Our website is built using Wix. Core Wix cookies may include XSRF-TOKEN, hs, svSession, SSR-caching, TS*, bSession, fedops.logger.sessionId, _wixAB3|*, server-session-bind, client-session-bind, oAuthState, wixSession and sec-fetch-unsupported.

These are primarily used for matters such as security, fraud or attack detection, session handling, site stability and platform operation.

Cookie names and the cookies used by installed applications or integrations can change depending on the features installed on the website.

Third-party services

Additional cookies may be placed by services integrated with our website, such as payment services, analytics, chat, advertising or other applications.

The cookies actually present can therefore change when website functionality changes. Our cookie-management system should provide the current categories and available controls.

Your choices

When you first visit the website, you may be presented with controls allowing you to accept or manage non-essential cookies.

You can change your preferences through the site's cookie or privacy controls.

Rejecting optional cookies should not prevent essential website functions from operating, although some optional features or analytics may be unavailable.

You can also delete or block cookies through your browser settings.

Changes to this policy

We may update this policy where the website, installed applications or cookie use changes. The revision date above shows when the policy was most recently updated.
